

2022 updates to shipping tools include:

April 2022

Update French text for the DO NOT SAFE DROP field label

Change French wording for the Do Not Safe Drop” field from “Ne pas laisse ren lieu sûr” to “Aucune remise en lieu sûr”

February 2022

Change UI Field Label

Change has made to the UI Field Label to now read the following: Tax ID/IRS/VAT/IOSS and French as Taxe ID/No IRS/TVA/IOSS

Revise Export Functionality to be able Override More Fields

Revise the export functionality to export actual overridden counts when generating export file.

Export file to be consistent with what the customer enters, regardless of the redistribution in play, to reflect the new override options.

Previously, customer could only override total and not individual target areas. As the total was modified, distributing the new total in the proportion of original count.

But with this change the customer will have the capability to override each counts, and expect to see the same count entered as is in the export file.
